PROFESSIONAL SUMMARY

Motivated and detail-oriented MCA student with a BCA background and strong foundation in software development, web technologies, database management, and programming. Skilled in Java, Python, C, JavaScript, React.js, Node.js, MongoDB, SQL, and Git. Experienced in developing academic and personal projects, with a strong interest in full-stack development, software engineering, and emerging technologies. Quick learner with good problem-solving, analytical, and teamwork skills, seeking an entry-level opportunity to apply technical knowledge and contribute to real-world projects.

EDUCATION

Institute of technology & Science

Master of Computer Applications

2015 – 2027

Ghaziabad, India

Institute of Management Education

Bachelor of Computer Applications

2022 - 2025

Ghaziabad, India

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, C++, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Node.js
- **Databases:** PostgreSQL, MongoDB, MySQL
- **Tools & Technologies:** Git, Github, VS Code, IntelliJ

KEY PROJECTS

Expense Tracker | *Axios, Chart.js, React.js, Node.js, Express.js, MongoDB, JWT, Tailwind, Css* Jun 2026 - July 2026.

- Developed a **React-based Expense Tracker** for managing daily income and expenses efficiently.
- Implemented **CRUD functionality** to add, edit, delete, and view expense records.
- Added **category-wise expense tracking** to monitor and analyze spending patterns.
- Created an interactive and responsive **dashboard** for displaying expense summaries and transaction history.
- Used **React Hooks and component-based architecture** for efficient state and UI management.
- Designed a clean, responsive interface for a smooth user experience.

Fake News Detection System | *Python, Machine Learning, NLP, Pandas, NumPy, Scikit-learn* Aug 2026 - Present

- Developed a **Fake News Detection System** in collaboration with **Soniya Kumari** to identify and classify potentially misleading or false news.
- Implemented **machine learning and natural language processing (NLP)** techniques for analyzing news content.
- Built a system to classify news articles as **Fake or Real** based on textual features and trained models.
- Performed **data preprocessing, text cleaning, feature extraction, and model evaluation** to improve classification performance.
- Designed an intuitive interface for users to enter or analyze news content and receive classification results.
- Focused on improving **accuracy, reliability, and automated detection** of misleading information.
